

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph beginning at page 2, line 12 with the following:

The One prior art document ~~US 3,624,958~~ describes a positioning control device for vertical edging stands for width adjustment of the rolled material by means of an electric screw spindle adjusting device, combined with hydraulic servo valve-controlled cylinder devices for adjustments against the rolling load. The cylinders are arranged at the side of the crossheads of the uprights of the vertical stands and are connected by a coupling plate with the adjusting nuts of the screw spindle adjusting device.
